### SMART Book Scanner

Qidenus Smart Book Scanner is a manual book scanner engineered to deliver outstanding image quality, excellent productivity, speed and ease of handling. Smart Book Scanner is designed for individual work: one operator, one book. Operator has full control over the scanner's 100° V-shaped book cradle, the position of the glass plate and scanning speed. Narrow opening angle and adjustable side flaps prevent book bindings from overextension and provide vital support for the book spine. This scanner is available in A2 & A1 sizes, scans virtually all types of books, offers scan speeds of up to 1.000 pages / hour, handles originals of up to 160 mm thick, utilizes the latest high-end CMOS sensors, and produces archival-grade images. This unique book scanner is an outstanding book scanning station – easy to use, portable, affordable and comes with no limitations on book texture, quality or weight.
