

DIGITIZATION SOLUTIONS FOR COUNTY RECORDS MANAGEMENT

County clerks, records managers and recorders are both the guardians of their community's history and the stewards of its future. Through digitization, information attendants can efficiently preserve and access vital documents - such as land ownership, marriage, death, education and other life records - to better facilitate the growth and prosperity of their towns, cities and neighborhoods.

The Crowley Company offers digitization solutions to suit any capture demand, media type or budget need. All Crowley distributed and manufactured hardware is supported and serviced by our certified in-house technicians.

MICROFORM PRODUCTS AND SOLUTIONS

Ideal for: Marriage certificates, meeting notes, blueprints and other records on any format of microfilm, microfiche or aperture card

- High-speed capture
- Remarkable resolution; FADGI-capable scanner models available
- Gentle transports to preserve the original media
- Automated scanning and processing features
- Pre-set templates for consistency between different projects and operators
- Space-saving models available
- Affordable image hosting with IMAGEhost

Analog options: Microfilm archive writers, duplicators, processors and microfilm

Brands: Mekele Technology; Wicks and Wilson; Crowley; IMAGElink; Zeutschel

ON-DEMAND SOLUTIONS

Ideal for: Low-volume office or patron walk-up capture of county records from microfilm, microfiche, aperture cards and bound / loose media

- Fast output to USB, email, cloud, network, printer and more
 - Single-unit microform reader/scanner for multi-media (microfilm, microfiche, aperture cards, film negatives, etc.)
 - Touchscreen walk-up overhead scanners for bound books, loose documents, photos and more
- IMAGEhost: digital microfilm repository

Brands: Crowley; Zeutschel
