

INTELLIGENT AUTOMATION YOU CAN TRUST.

ImageTrust represents the forefront of intelligent web-based capture platforms, facilitating centralized and remote document intake and comprehension. Through AI-driven orchestration, our platform streamlines process automation, elevating accuracy and delivering crystal-clear content insights to your organization.

INTELLIGENCE TO INSIGHT

Through our Trusted AI connectors, ImageTrust facilitates seamless connectivity to Hyperscalers and leading AI technologies, ensuring swift access to the intelligence you need. Our Trusted AI feature provides rapid connectivity to the latest AI models from top Hyperscalers and a myriad of boutique AI providers, empowering you with cutting-edge capabilities. This trusted access not only drives intake efficiency but also guarantees that you stay at the forefront of emerging AI technology. With ImageTrust, accessing insights has never been easier or more secure.

TRUSTED INTAKE

We understand that trusted insight stems from trusted intake. Our intake process is seamlessly integrated into workflows and ensures the highest quality content for AI analysis. Whether it's driving scanners, importing from emails, or utilizing mobile devices, our goal remains consistent: optimizing document quality through image enhancements. With emphasis on security, compliance, and scalability, we guarantee that every step of the intake process aligns with the standards of ImageTrust.

Security

Ensuring data integrity and protection throughout intake procedures

Compliance

Adhering to industry regulations and standards for data handling

Scalable

Designed to accommodate varying workloads and growth demands seamlessly

Sustainable

Our highly optimized architecture reduces your hardware footprint and energy consumption, helping you meet your sustainability initiatives

TRUSTED CONNECTORS

Experience the seamless integration capabilities of the ImageTrust platform. The platform effortlessly bridges the worlds of legacy ECM solutions and cutting-edge cloud-based offerings. Our ImageTrust user interface seamlessly embeds into any web-based workflow solution, whether it's Salesforce, Box, SharePoint, AWS S3, or custom client portals. This ensures that enhanced intelligence is readily available, exactly when and where it's needed most, empowering your workflow with unparalleled efficiency and insight.

REDACTION

Digital documents containing sensitive information pose a risk of unauthorized access within your organization. ImageTrust employs state-of-the-art classification techniques to detect and manage sensitive data, preventing inadvertent disclosure. Our automatic redaction capabilities remove the need for manual oversight, providing real-time guidance to end users for precise redaction, ensuring accuracy and compliance.

FEATURES

Our key features include powerful functionality that enhances document classification and extraction, simplifying workflow automation using the latest in AI technology.

Real-Time AI Insights

Real-time analysis and comparison of various AI extraction engines allows you to see which engine performs best for your specific needs and data types.

Trusted HITL Experience

Advanced AI technology combined with human intelligence ensures accuracy and reliability in data extraction and processing.

Low-Code No-Code Configuration

Configure and seamlessly integrate ImageTrust with your existing systems using our low-code no-code solution, minimizing disruption and maximizing efficiency.

Embed in any Cloud Content Management & Workflow Solution

Intelligently capture, classify, and extract for added content intelligence within your existing Line of Business user interface.

Bringing innovation to automation with our trusted digital transformation solutions

- ✓ Accounts Payable Process Automation
- ✓ Sales Order Processing
- ✓ Claims Processing
- ✓ Digital Mail
- ✓ Content Migration
- ✓ Content Crawling
- ✓ New Account Opening
- ✓ Health & Human Services / Child Care Support
- ✓ Legal Processing / Subpoena Requests

TRUSTED INTEGRATIONS

ImageTrust's intelligent integrations give you easy, rapid connectivity to the latest AI models from top Hyperscalers and numerous boutique AI providers.

- Embedded In Salesforce
- Google CGP Document AI
- Azure AI Document Intelligence
- AWS Textract
- ImageTrust for Box

Follow Us! @crowleyscans

We needed a solution that could provide a guided workflow for users to upload documents into Salesforce. One that would ensure the collection of required metadata and do things like enforce file naming conventions, etc.

ImageTrust is working great for us and the service and support we have received has been excellent.
