

## Production-class ADF scanning SP-1425 Document Scanner

Compact small office scanner with TWAIN and ISIS® support and the versatility of a document feeder + flatbed

### The small business scanner that handles it all

- Powers through your documents at up to 50 images per minute (duplex).
- Efficiency built right in, with both Automatic Document Feeder (ADF) and flatbed scanning options
- Supports documents up to 120" long

### Clean image processing with PaperStream IP for SP Series

PaperStream IP (PSIP) for SP Series is a TWAIN/ISIS®-compliant driver that cleans up and optimizes scanned images without any advance settings. PSIP features:

- **Auto Color Detection** to automatically identify the best color mode for the document
- **Multi-Image Output** to release images in more than one output format
- **Blank Page Detection** to automatically remove blank pages document gets accurately captured from edge to edge

### PaperStream ClickScan simplifies scanning

Easy to use capture software for any business. Simple scanning interface with 3-steps: scan, select destination & save.

### PaperStream Capture Lite specializes in routine scanning

The easy-to-understand interface ensures easy operation from start to finish. Routine operations like batch scanning are made quick and easy, so the SP-1425 will fit into your workflow without a lot of software to learn and drivers to configure. Blank page separation makes batch scanning a breeze for operators.

### Make it even better with PaperStream Capture Pro

Optional PaperStream Capture Pro software offers superior front-end capture, image processing, and options for enhanced data extraction and indexing for release. Ask your Ricoh representative about a complete scanning solution for your business. PaperStream Capture Pro software sold separately.

### Centralized fleet management

Includes Scanner Central Admin to remotely manage your entire fi Series and SP series fleet. Effectively allocate your resources based on scan volume, consumables wear, and more.

## Insist on Genuine Ricoh Service to keep your scanner running at its best

<sup>\*1</sup> Maximum output resolutions may vary, depending upon the size of the area being scanned and whether the scanner is scanning in simplex or duplex. <sup>\*2</sup> Software interpolated. <sup>\*3</sup> Scanning limitations brought about by scanning mode, document size and available memory may occur when scanning at high resolutions (600 dpi or higher). <sup>\*4</sup> Intel® Core™ i5 desktop processor 2.5 GHz or higher, 4 GB RAM is recommended. <sup>\*5</sup> Actual scanning speeds are affected by data transmission and software processing times. <sup>\*6</sup> JPEG compressed figures. <sup>\*7</sup> Maximum capacity varies, depending upon paper thickness. <sup>\*8</sup> Excluding the ADF Hopper. <sup>\*9</sup> PPU Limited, a Ricoh company, has determined that this product meets RoHS requirements (2005/95/EC). <sup>\*10</sup> Capable of scanning documents that exceed A4 sheets in length. However, the scanning of documents longer than 34" requires lower resolution (200 DPI or less). <sup>\*11</sup> SP Series scanners do not run with Windows® 11 and 10 ARM-based PCs. <sup>\*12</sup> Replacement cycles are guidelines for using A4 documents (80 g/m2 [20 lb]). These cycles vary depending on the type of documents scanned, how often the scanner is used and cleaned, and your operating environment.
